## PROFILE

Final-year Software Engineering student with proven expertise in Mobile Development (Flutter) and Backend Engineering (Laravel/Spring Boot). Experienced building scalable apps for logistics and environmental sectors, including Generative AI integration, Location-Based Services (LBS), and secure reporting platforms. Strong grasp of SDLC, Agile, and OOP principles, backed by hands-on internship experience and leadership as a Google Student Ambassador. Seeking a professional software engineering role to apply technical skills, adaptability, and problem-solving ability.

## EDUCATION

### Politeknik Negeri Bengkalis 2022 – 2026 (Expected)

Bachelor of Applied Science (B.ASc), Software Engineering · GPA: 3.75 / 4.00

- Core Competencies: SDLC, Agile Methodologies, Data Structures, Data Mining, Artificial Intelligence (AI), Object-Oriented Programming (OOP).
- Relevant Coursework: Software Engineering, Mobile & Web Programming, Database Management Systems, Software Testing & QA, Software Analysis & Design.

### Universitas Airlangga 2024

Exchange Student, Informatics Engineering (Pertukaran Mahasiswa Merdeka)

- Focus: building Multiplatform & Web Applications and studying IT Project Management methodologies.

## EXPERIENCE

### Mobile Developer Intern — Assist.id Mar 2026 – Jul 2026

Internship · Pekanbaru, Riau, Indonesia (On-site)

- Architected an HR & Attendance mobile app from scratch using Flutter and Clean Architecture, keeping code maintainable across Data, Domain, and Presentation layers.
- Independently implemented security hardening (jailbreak detection) and graceful error handling to prevent UI crashes and ensure a seamless user experience.
- Optimized API search with a 500ms debounce (RxDart) to cut server load, and elevated the UI with smooth animations and skeleton loaders for dynamic states.
- Built enterprise-grade modules — a multi-role Room Booking system, a BLoC-based Daily Report module, and an Excel (.xlsx) export feature with custom styling — and refactored Node.js API payloads for strict null safety and English/Indonesian localization.

### Research Assistant (Computer Vision) — Politeknik Negeri Bengkalis Nov 2025 – Feb 2026

- Collaborated with faculty on a traffic monitoring research project, developing "Bengkalis Traffic Intelligence" using YOLOv8 for real-time vehicle classification and a FastAPI-based data pipeline.

### Community Service Tech Lead — P3M Nov 2025

- Spearheaded digital transformation for local SMEs by implementing a custom Point of Sales (POS) system, integrating hardware to streamline transactions and inventory.

### Google Student Ambassador — Google Aug 2025 – Present

- Organized "Gemini AI Socialization" events and led creative campaigns promoting Google developer tools, significantly increasing student engagement across platforms.
- Selected as a campus leader bridging Google technologies and university students.

### Staff of HR & Development (Kaderisasi) — HMTI Feb 2024 – Jan 2025

- Coordinated the annual orientation program for 200+ new students and collaborated with the core committee on member evaluation and regeneration strategy.

## KEY PROJECTS

### Rekaloka | Mobile Developer & Project Manager Nov 2025 – Present

- Gamified cultural heritage exploration app (Flutter) using LBS for proximity-based content, with a Generative AI feature reconstructing 2D prompts into 3D cultural models and a geolocation-based mission validation system.

### Siap PA | Full Stack Mobile Developer May 2025 – Jun 2025

- Secure reporting platform for violence against women and children (Flutter + Laravel), with multimedia evidence upload, real-time status tracking, and an authority monitoring dashboard.

### **My Presensi | Android Developer   Feb 2025 – Apr 2025**

- Secure LBS-based attendance system with a custom Fake GPS Detection algorithm, optimized for reliability on low-bandwidth Android devices.

### **GreenPoint | Mobile Developer   Nov 2024 – Jan 2025**

- Digital waste bank app (Flutter + Laravel) with QR code transactions, Google Maps-based bank locator, Google Sign-In, and real-time push notifications.

## **CERTIFICATIONS & ACHIEVEMENTS**

---

- Certified Junior Mobile Programmer – BNSP (National Professional Certification Board)
- Flutter Developer Expert (Beginner–Expert Path) & Back-End Application Development – Dicoding Indonesia
- SOLID Programming Principles & Cloud Practitioner Essentials (AWS) – Dicoding Indonesia
- Merdeka Student Exchange Program, Batch 4 – Kampus Merdeka
- 2nd Best Winner, ICIF 2025 & Favorite Junior Developer, ICIF 2024 – Politeknik Negeri Bengkalis

## **TECHNICAL SKILLS**

---

- Programming Languages: Dart, PHP, Java, JavaScript, Python
- Frameworks: Flutter, Laravel, Spring Boot, FastAPI, Express.js
- Tools & Cloud: Git, Firebase, REST API, AWS (Essentials), Postman, Google Maps API, Power BI
- Methodologies: Agile (Scrum), OOP, SOLID Principles, Clean Architecture, SDLC

## **PERSONAL SKILLS**

---

Public Speaking • Fast Learner • Adaptability • Team Leadership • Project Management • Problem Solving • Cross-Functional Collaboration • Time Management
